Implementation Plan for the Medium Term Development Strategy 2013-2017 (First Draft)

Continuing the Journey to Sustainable Prosperity...

The Implementation Plan for this Medium Term Development Strategy, 2013-2017 is the main element of the Strategy. All components of the Strategy were derived through the consultative process applied throughout the development stages.

The Plan remains focused upon the five long term Goals of [Prudent] Economic Management; [Enhanced] Human Development; [Sustainable] Environmental Management & [Appropriate] Disaster Mitigation [Practices]; [Good] Governance and Population [Growth]. It builds upon the progress of the 2008-2012 Medium Term Development Strategy, which constituted the first stride towards Montserrat's 2020 vision. It further details the specific Objectives for each Goal; the Sub-objectives which define what strategies will be undertaken as a determination of *how* the Objectives will be achieved; the key actions that must be carried out to deliver at the Sub-objective level; the data measures (Indicators) and the performance levels (Targets).

At the strategic level, the Plan is bound by the **five year** time period for the attainment of all associated outcomes. The success of the plan hinges heavily upon the collaboration between the identified lead and support implementation partners for each Strategic Action. In this regard, there are a number of stakeholders responsible for the successful execution of the Plan: the private sector, the public sector, youth, Civil Society and donor partners.

Through the presentation of clearly articulated logical success benchmarks, the Plan seeks to ensure that progress can be monitored and evaluated against expected outcomes. The Policy and Planning Department manages the implementation process at the strategic level. This oversight role is carried out with full regard for the anticipated development aspirations of the people of Montserrat. Collaboration between implementing and monitoring agencies is pivotal to the management of the process.

This Strategy recognizes and takes active account of the strategic relationships between all facets of development planning. In particular, in this medium term, the strategic approach which was adopted captures population growth and retention aspirations as a crosscutting theme: all other Goals have been strategically focused to include activities which will result in the well-defined goal of sustainable population growth... The *'build it and they will come'* philosophy resides at the heart of this development approach. Stakeholders widely shared the view that population is a function of developments in all of the other Goals. Population Growth will come from our achievement of Prudent Economic Management, Enhanced

Human Development, Sustainable Environmental Management & Appropriate Disaster Management practices and Good Governance...

The Process of Development for the Medium Term Development Strategy, 2013-2017

A consistent approach was employed in the development of the Implementation Plan for this second MTDS of the 2008-2020 Sustainable Development Plan: the Advanced Participation Method of consensus building was used to facilitate the process of ensuring that the Strategy comprised only the agreed development priorities that would lead Montserrat along its Journey to Sustainable Prosperity. An experienced facilitator (Trevor Spence), led the various stakeholders through a series of consensus building activities during the development of the MTDS.

Prior to the national consultations, the Policy and Planning Department conducted a performance review of the previous five-year period. This constituted a monitoring and evaluation exercise in which the implementing agencies reported on progress achieved for their respective targets. The reference period for the review was 2008-2012.

The five-year review results were shared with the stakeholders during the two-day Review Workshop (June 27th and 28th) for the purpose of validation of the information gathered. The revised data were further shared with stakeholders who represented the various Goals at four daily workshops: Economic Management (July 1st), Human Development and Population (July 2nd), Environmental Management and Disaster Mitigation (July 3rd) and Governance (July 4th).

Consultations continued with several focus group sessions: about thirteen youngsters represented their primary schools (Lighthouse Academy, St. Augustine Roman Catholic, Lookout, Brades), the Diaspora, Senior Government Officials, the Legislature, His Excellency, Governor Davis, additional private sector individuals, the Old People's Welfare Association, Montserrat Association of Retired Persons and Red Cross. The first set of key elements of the MTDS emerged from these consultations: Objectives, Sub-objectives and Strategic Actions.

Several technical sessions were held, followed by two final sessions (July 22nd).

The in-house team led by the Director, Policy and Planning (Angela M. A. Estwick), with support from Development Planner (Daniel Naku), Senior Policy Analyst (Astley Henry) and Policy and Planning Officer (Deonne Semple) undertook in-house processing of the data and from that emerged the first draft set of Objectives, Sub-Objectives, Strategic Actions, Indicators and Targets. This process entailed ensuring that activities highlighted as necessary were realistic and remained aligned with the concept of sustainable development established for Montserrat.

These are presented below after the SWOT analysis of Montserrat's development environment.

Table 1 – CURRENT REALITY DIALOGUE BOX MTDS 2013-2017–

ACCOMPLISHMENTS	OPPORTUNITIES
<ul style="list-style-type: none"> • Completion of Phase 1 Little Bay Project • Establishment of regular Ferry Service • Geothermal exploration • Reduction in agricultural imports • Improvement in Port Development • Increase in export of sand and aggregate • Air Services Agreement • Enabling business environment - out-sourcing school buses, increase in exports of volcanic material. This is disputed by statistics • Economic Residency • Energy policy with incentives to encourage investors • Funding approved for hospital development • Visiting Specialists Programme • Dental Clinic • Improved HIV testing and free testing • Improved and increased housing solutions • Housing for vulnerable people • Additional classroom space • Development of Solid Waste Policy • Training of fire, rescue and emergency response • Early Warning System • Updated aerial photography of Montserrat • Disaster Management Training • Reduction of invasive species • Legislative Reform (adoption of Constitutional Order) • Improvement in Regional Integration (OECS) • Labour and Immigration Code enacted • Greater stakeholder involvement in planning and policy development • Establishment of a new Constitution • Efforts at Public Service Reform • Machine Readable Passports • ICT Bill which includes liberalization of ICT • 100% enactment of Laws that have been identified for that period • Restructuring of the Internal Audit Department • Framework for Crime Management • Crime reduction strategy • Integrity Act 	<ul style="list-style-type: none"> • Private Sector growth • Establish wider economic space by making Regionalism a reality • Geothermal development to drive economy and standard of living • Develop a niche Tourism Market – a unique brand of Ecotourism • Expand on Eco and Regional Tourism • Attracting new businesses • Access – new business in the Travel Industry • Exploit value chain for local fruits and vegetable • Reduce imports of foodstuff to get local farmers space to make money • Improve and expand Backyard Gardening and Greenhouses • Design and build a Model New Town • Expansion of Air Services as demand increases • Power Station upgrade • Expanding Sand Quarrying Industry • Leverage ICT Sector • Regional integration (population increase, greater skill base and marketing for Montserrat) • Establishment of accredited Tertiary Institutions • Introduce new subjects at the Secondary and Tertiary levels with the objective of enhancing Vocational and Prevocational Training • Improve general Healthcare provision • Improvements in the awareness in the need for Specialist Healthcare • New Hospital and new Medical School will increase access to Healthcare • To create and improve standards in what we produce (quality of services, food) • Opportunity for Diaspora to participate in Development Planning • Funding • Constitutional Order means space for reformed Governance Structure • Focus government's policies and priorities. We have too many priorities. • Identify and capture local resources including intellectual resources • Streamline government processes linked to <i>One Stop Shop</i> • Introduce equipment for Machine Readable Passports (MRPs) locally • To start anew – rebuild and redraft (update a series of legislation, but more generally rebuild nationally) • Agencies and Ministries to strengthen and build collaboration efforts • Reposition Montserrat • Access and exit Montserrat through different routes • Opportunity to share information through social media • New constitutional opportunities – absence of leave to go into politics • Opportunity to build a multilingual society • Capacity building in the Public Service

WEAKNESSES

- Affordability of Air Services
- Deficiency in infrastructure – roads and access to the island
- Absence of Sewage Master Plan
- Montserrat has to take advantage of Regional Free Trade Agreements – movement of goods and people
- Inadequate link of financial to strategic actions
- Inadequate social policy framework
- Inadequately skilled human resources
- Public sector capacity building is poor
- Not enough incentives to retain local population
- Policy guidelines not in line with SDP (Population growth policies do not really support SDP objectives)
- Lack of population strategic plan and policy
- Population size
- Education system failures – security
- Limited educational opportunities (only to a few)
- Shortage of practical subjects offered at MSS
- Deficiency in Health Services – lack of availability of basic tests on-island
- Inequity in access to dental services (only school children, old and pregnant people get free service. There is no affordable access)
- Inadequate emergency services
- Lack of stakeholder involvement
- No Freedom of Information Act
- Lags in project implementation
- Restructuring fatigue
- Poor interagency coordination
- Inadequate border security
- Insufficient ownership of the plan by Public Sector and NGOs
- Lack of reasons to visit Montserrat (cannot attract visitors)
- Complacency – lack of responsiveness of Public Service
- Inadequate M&E – increased requirement for reporting
- No machines to read MRPs locally
- Too many activities, with too limited resources in a short time frame
- Not enough collaboration in planning. For example, in order to increase food production collaboration is necessary across sectors

CHALLENGES

- Food Security
- Price of fuel
- High cost of living
- Small market size
- Weak Private sector
- Population has not increased sufficiently to make Montserrat viable
- Also aging population and mass migration of young (composition)
- Young people cannot communicate because they are hooked on electronic devices
- Improvement in access to medical equipment and supplies
- Health financing – not reclaiming costs from insurers such as Sagacor
- Non-communicable diseases and obesity
- Lack of resources and skilled people to deal with natural disasters
- Insufficient systems, strategic thinking and ongoing volcanic situation creating uncertainty
- Inadequacy of waste water treatment
- Shifting priorities sometimes results in incomplete projects
- DfID funding and conditions
- Funding and demand through conditions of funding agencies
- Lack of financial resources and technically trained persons to allow succession planning
- Misinformation shared through social media
- Sharing negative aspects rather than sharing achievements
- Inadequate knowledge and interest in SDP
- Culture is too laid back
- Being forced to implement international regulations which have a negative impact on a small society
- Taxation increasing travel costs (Antigua!)
- Reliance on external partners who have their own priorities
- Funds to identify projects and address reform
- Sourcing and retaining suitable technical skills
- Absence of regular checks and balances
- Uncertainty – think and plan positively while dealing with the treat of the volcano
- Mass transport of people to and from the island. Airport has limited capacity. How will the deep water harbor affect people travelling to and from Montserrat?

Development Planning Concepts used in the Montserrat Medium Term Development Strategy 2013-2017

GOALS:

...a long term, time bound, desirable socio-economic condition (end state), focused on national development. It is considered to be a practical/realistic end state taking into account the strengths, weaknesses, opportunities and challenges of Montserrat as a developing Caribbean country. Upon accomplishment, the Goals should reflect the Vision.

STRATEGIC OBJECTIVES:

...very focused, specific, measurable, achievable and time bound outcomes which respond to a developmental need; Strategic Objectives occur together or sequentially to achieve the Goal. They constitute the 'what will be achieved' in relation to the Goal.

SUB-OBJECTIVES:

...a set of deliberate strategies or guidelines, which map out how the Strategic Objective will be achieved and by when. These constitute the 'how will it be achieved' in relation to the Goal.

STRATEGIC ACTIONS:

...the most important, preselected activities that constitute a plan to ensure that the Sub-objectives are achieved within a timeframe.

INDICATORS:

...quantitative (qualitative) data measure which can suitably represent the state of performance (relevant to the objective), at any point in time.

TARGETS:

...a level of performance towards which we are striving and which can be measured.
